

MARKET Backflow Prevention

PRODUCT(S) Differential Pressure Indicator DPI/DPIS

REQUIREMENT Provide a cost effective way of measuring backflow prevention device operation

PROCESS FLUID(S) Potable Water

INLET PRESSURE/TEMPERATURE 100psi / Ambient

Description: Backflow prevention devices provide valuable protection against cross contamination of feed sources. The DPIS provides a visual indication of proper operation, and the integrated reed switch provides an electrical alert to a control station in case of a malfunction.
